

### Assignment – 3

Ques -1. Does ANSI recognize the data type DATE?

Ans-1. ANSI SQL does't have a specific data type called "date", however it does recognise date and time related data types such as DATE, Time , TimeStamp etc. MySQL supports the DATE data type which is consistent with ANSI SQL standard.

Ques -2. Which subdivision of SQL is used to insert values in tables?

Ans-2 DML(Data Manipulation Language) is the sub-division of sql that is used to insert values in Tables.
